

Identification of Area 19

Name or Designation:

Ballard, Fremont, Green Lake

Boundaries:

North--North 95th Street from Puget Sound east to Interstate 5

East---Interstate 5 from NE 95th Street south to NE 50th Street, west to

Woodland Park Avenue N, south to N 39th Street where Woodland Park

Avenue N becomes Albion Place N, continuing south to the Lake Washington Ship Canal

South--The Ship Canal northwest through Salmon Bay to Shilshole Bay

West---Puget Sound from Shilshole Bay north to N 95th Street

The waterfront properties along the Lake Washington Ship Canal, Salmon Bay and Puget Sound are excluded from this area and are included in area 20-10.

Maps:

A general map of the area is included in this report. More detailed Assessor's maps are located on the 7th floor of the King County Administration Building.

Area Description:

Area 19 is comprised of five neighborhoods located in Northwest Seattle. They are older, established neighborhoods with a mix of residential, commercial and industrial properties. The area's affordability has created a demand for transition observed through the demolition of existing residential, commercial and industrial improvements and subsequent construction of new mixed-use buildings, multi-family dwellings and commercial structures.

Physical Inspection Area:

The physically inspected neighborhood was 19-20. This neighborhood is comprised of the industrial area of Ballard located south of NW 60th Street to N 35th Street and east of 15th Ave. NW to Greenwood Avenue N excluding any waterfront parcels.

Area 19 is comprised of the following five neighborhoods:

Ballard (19-10) The majority of the commercial properties in this neighborhood are located on or near 15th Avenue NW or NW Market Street. Developers are maximizing density limits via new mixed use and multi-family construction. Historic Ballard has become a popular locale and some rehabilitation of the older buildings has been occurring with the consequent infusion of new restaurants, studios and retail businesses. The City of Seattle has acquired both the old Safeway and US Bank properties in order to develop a park, neighborhood service center and the new Ballard Library. Swedish Medical Center/Ballard and surrounding clinics are also situated in this neighborhood.

Industrial Ballard (19-20) This neighborhood takes in the portion of Ballard located from 15th Avenue NW east to Palatine Avenue N and from NW 60th Street south to the Lake Washington Ship Canal. Recent additions to this neighborhood include a Fred Meyers Store and a Safeway Superstore. The majority of the parcels are zoned IBU and IGU. Transition of the industrial zoned land is occurring with the construction of office and retail buildings and is demonstrated by the construction of the 92,000 square foot Ballard Lofts building adjacent to the Ballard Bridge and the 2002 construction of a combination Jack in the Box restaurant, 7-11 convenience store on Leary Way NW at the site of a former auto wrecking yard.

Fremont (19-30) This neighborhood is a mix of restaurants, studios, unique retail shops and older mixed-use properties. It is an area in transition. Single-family homes on L2 and L3 zoned land are being demolished and replaced with condominium and common walled townhouses to maximize the allowable housing densities. Redevelopment and relocation of some of the landmark properties is now occurring. The is most evident in the move of the Red Door Tavern from the corner of N 34th and Fremont Avenue N down one block in order to make available the land for a new mixed use building with a proposed 130 residential units. Notable to this neighborhood is the positive economic influence felt from the tenants of the Quadrant Lake Union Center (Adobe) and the Park View Buildings (Getty Images).

Greenwood/Green Lake (19-40) This sub-area includes the Greenwood, Green Lake, Phinney/Woodland Park and Aurora Avenue N commercial districts. New mixed-use buildings that maximize multi-family densities are plentiful, and under construction in Greenwood is a project on N 85th St. with 1st floor retail and 139 residential units above. Three mixed-use condominiums are planned in the Phinney Ridge neighborhood. The Green Lake are continues to be a popular location for businesses and recreation. A mixed-use condominium with 104 residential units is being constructed on the very visible corner of NE 70th St. and Woodland Avenue N. Rezoning of C140 land to NC265 occurred for this project.

Crown Hill/North Ballard (19-50) The majority of commercial properties in this neighborhood are located on 15th Ave. NW from NW 60th St. north to Holman Road. In recent years, this area has gained a Safeway Superstore, Value Village, and most recently, a new mini shopping center with McDonald's Restaurant, Tully's Coffee and Blockbuster Video as tenants. Another major change that is occurring in this neighborhood is the redevelopment of L-2 and L-3 zoned parcels from single to multi-family dwellings.

Preliminary Ratio Analysis:

A Preliminary Ratio Study of the sales of improved parcels was completed prior to the application of the 2002 recommended values. This study benchmarks the current assessment level and uniformity statistics using the 2001 posted values. The study was repeated after application of the 2002 recommended values. The results, which are included in the validation section of this report, show an improvement in the COV from 14.55% to 6.50%.

Scope of Data

Land Value Data:

Vacant sales from 1/99 through 3/02(at a minimum) were given primary consideration for valuing land. Sales were all verified as good and coded as 02 in the Assessor's records. Multi-parcel sales were also considered after combining the assessed values of all parcels involved in the sale.

Improved Parcel Total Value Data:

Improved sales from 1/99 through 3/02(at a minimum) were given the most consideration for establishing total values. Sales information is obtained from excise tax affidavits and reviewed initially by the Accounting Division, Sales Identification Section. Information is analyzed and investigated by the appraiser in the process of revaluation. All sales were verified if possible by calling either the purchaser or seller, inquiring in the field or calling the real estate agent. Characteristic data is verified for all sales if possible. Due to time constraints, interior inspections were limited. Sales are listed in the "Sales Used" and "Sales Not Used" section of this report.

Land Value

Land Sales, Analysis, Conclusions:

All parcels in area 19 are located within the City of Seattle and various zoning designations are represented. Vacant land sales recorded between January 1999 and December 2001 were considered to be most representative of the current market. There were 32 land sales available to be used in the ratio calculation. Information from an additional 66 transactions involving parcels that have since segregated or reside in the residential system were taken into account during the land valuation process. Sales prices tended to increase near the neighborhood centers (Fremont, Green Lake, Ballard) and decrease towards the northern boundary of area 19 and when the proximity is close to Aurora Avenue N. In general, sales that occurred in 1999 garnered a lower price per square foot than those closed in 2001. Due to the scarcity of vacant sites in this area, many of these parcels were improved at the time of sale and the structures then demolished to allow the land to be developed at its current highest and best use. The most prevalent activity appears to be with L2 and L3 zoned parcels. Builders are maximizing the density potential of these multi-family zoned parcels through the construction of new common wall housing and multi-family dwellings offered for purchase or lease. No dissimilarity in sales price per square foot between L2 and L3 zoned land has been observed. Fewer land sales occurred in 2001 but the sales price per square foot sustained or superceded previous levels.

Ballard (19-10) This sub-area includes the historic district and downtown business center of Ballard. Sales of neighborhood commercial, industrial and multi-family zoned vacant parcels were represented during the outlined date parameters. Two vacant industrial sites sold for \$30.00 per square foot. There was 1 sale of NC365 land for \$70.00 per square foot. Two MR-RC zoned parcel sold for \$60.00 and \$85.00 per square foot and L2/L3 sites ranged from \$32.00 to \$55.00 per square. Most of the commercial purchasers were developers of mixed-use properties and the multi-family sales were to builders for townhouse construction.

Ballard Industrial (19-20) This sub-area includes many parcels with general industrial (IG) or industrial buffer (IB) zoning as well as multi-family L2 and L3 designations. There have been 4 sales of industrial land since 1999 and they ranged in price from \$30.00 to \$35.00 per square foot. One of the sales, the former parking lot for ProLab on Canal Street, now has a newly constructed office on it. Two of the parcels required soil remediation prior to closing due to a history of automobile and heavy equipment storage onsite. One is pending development and the other is the site of a new fast food and convenience store with gas. The L2 and L3 sales prices ranged from \$40.00 to \$60.00 per square foot.

Fremont (19-30) Two commercially zoned C140 land sales occurred in this area within the given date parameters. Both were located on Aurora Avenue North. One closed in September 1999 and the other in September 2000. They sold for \$26.00 and \$38.00 per square foot respectively. The center of the Fremont District is also located in this sub area. Some of the redevelopment in this area is done on leased land so land sales are limited. Due to the lack of recent commercially zoned land sales in this immediate neighborhood, market data from similar adjacent neighborhoods was drawn on to help formulate the land valuation model. Multifamily development continues to thrive. L2 and L3 parcels had a sales price range per square foot of \$48.00 to \$72.00.

Greenwood/ Green Lake (19-40) This area includes the eastern portion of Greenwood, Phinney Ridge/Woodland Park, the Aurora Avenue N corridor and the Green Lake community. Commercially zoned land sales in the Greenwood area ranged from \$25.00 to \$27.00 per square foot. L2 and L3 sales ranged from \$31.00 to \$48.00 per square foot. Near Green Lake, there was a sale of NC1/30 zoned land for \$47.00 per square foot and a sale of NC3/40 land for \$69.00 per square foot. L2 and L3 sales prices in the Green Lake area ranged from \$53.00 to \$80.00 per square foot depending on the proximity to Green Lake. In the Phinney Ridge/Woodland Park neighborhood NC2/40 zoned land sold for \$56.00 and \$83.00 per square foot. There was one L3 land sale of \$80.00 per square foot. One parcel C1/40 zoned land on this section of Aurora Avenue N sold for \$43.00 per square foot.

Crown Hill (19-50) This is the most northwestern neighborhood in area 19 and is primarily zoned multi-family. Commercially zoned properties are prevalent along 15th Avenue NW and on NW 85th Street. The sales prices for commercial land range from \$42.00 to \$56.00 per square foot. Multifamily L2 and L3 land continues to sell and be improved immediately. The sales prices range from \$35.00 to \$57.00 per square foot.

Vacant Land Model:

The Sales Comparison approach to valuation was considered the most reliable and was utilized in the land valuation model. Values were estimated as a price per square foot. Location, zoning and development potential were the primary variables considered in the valuation process. Variations in the ranges for specific zoning are due to proximity to neighborhood centers and the Aurora Avenue corridor. The assessed land value for the 2001 assessment year for Area 19 was \$753,919,900. The recommended assessed land value for the 2002 assessment year (taxes payable in 2003) is \$877,551,100 which results in an average change from the 2001 assessment year of +16.40 %. This increase in land values is intended to improve uniformity, assessment levels and reflect continuing demand for land in the North Seattle real estate market.

Zoning	19-10 Ballard	19-20 Ballard Industrial	19-30 Fremont	19-40 Green Lake	19-50 Crown Hill

Improved Parcel Total Values:

Sales comparison approach model description:

There were 61 improved sales in Area 19 that were considered to be fair market transactions. All sales were verified with a knowledgeable party when possible. Each sale was inspected and the recorded property characteristic adjusted when necessary. The resulting data was stratified according to use, location, age and size in order to establish appropriate ranges of price per square foot to use as guidelines.

Cost approach model description:

On those properties where a cost approach was done the Marshall & Swift Commercial Estimator was used. Depreciation was also based on studies done by Marshall & Swift Valuation Service. The cost was adjusted to the western region and the Seattle area.

Cost calibration:

Each appraiser valuing new construction can individually calibrate valuations to specific buildings in our area by accessing the computerized valuation model supplied by Marshall & Swift Valuation Service.

Income capitalization approach model description:

The income capitalization approach was considered for individual properties using economic rental rates taken from published sources and rental rate opinions from various Real Estate professionals active in specific areas. Rental surveys were also taken by each individual appraiser on specific properties. Expense ratios were estimated based on industry standards and familiarity of each areas operating expenses. Capitalization rates were determined by personal analysis of the sales in each area and industry averages.

The Income Approach was considered the most reliable method of valuation throughout area 19 and was facilitated when appropriate. Income tables were developed for all neighborhoods and applied to a variety of properties including, but not limited to, retail stores, service garages, offices, warehouses and industrial buildings. Net rents were used when possible. Vacancies remained low in this area so a 5% vacancy rate was applied. Some capitalization rates were adjusted from previous levels in response to the current real estate market.

Income approach calibration:

The tables were calibrated after setting economic rents, vacancy, expenses and capitalization rates by using adjustments based on size, effective age, and construction quality as recorded in the Assessor's records.

Property Type	Typical Rent Range	Overall Rent Range	Expenses	Overall Capitalization Rate Range
Offices, Medical Offices, Veterinary Hospitals, Dental Clinics	\$12.00-\$15.00	\$8.00-\$19.00	10.00% - 25%	8.75% -10.00%
Retail, Barber, Bar/Taverns, Mini Mart, Restaurant	\$12.00-\$15.00	\$5.00-\$16.00	10.00% -25.00%	8.75% -10.00%
Warehouses; Storage/ Distribution/ Food Stores, Light Industrial Basement Finished	\$5.50-\$7.00	\$3.00-\$8.00	10.00%	9.00% -9.50%
Offices; Mezzanine/ Warehouse/ Basement, Loft Health Club, Supermarket, Discount Store	\$6.00-\$8.00	\$3.00-\$11.00	10.00%	9.00% -9.50%
Service Repair Garages, Automotive Centers	\$8.00-\$11.00	\$7.00-\$15.00	10.00%	9.00% -9.50%
Equipment Building, Garage Storage, Sheds, Basement Parking	\$2.00-\$2.50	\$1.00-\$3.50	10.00%	9.00% -9.50%
Mini-Lubes	\$10.00-\$22.00	\$16.00-\$20.00	10.00%	8.75% -9.25%

The Vacancy Rate for all property types in Area 19 was considered at 5%.

Model Validation

Total Value Conclusions, Recommendations and Validation:

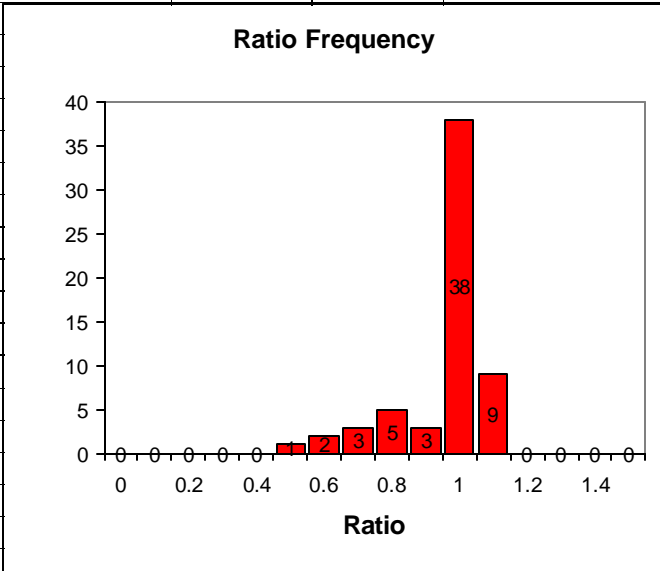

Appraiser judgment prevails in all decisions regarding individual parcel valuation. Each parcel is field reviewed and a value selected based on general and specific data pertaining to the parcel, the neighborhood, and the market. The Appraiser determines which available value estimate may be appropriate and may adjust for particular characteristics and conditions as they occur in the valuation area.

Application of the total Value Model, described above results in improved equity between individual properties, as shown by the improvement in the COV from 14.55% to 6.50% and the COD from 8.50% to 4.46%. This reflects a marked improvement from previous values. In addition, the resulting assessment level is 95.00% and falls within IAAO performance guidelines. These figures are presented in the 2001 and 2002 Ratio Analysis charts included in this report.

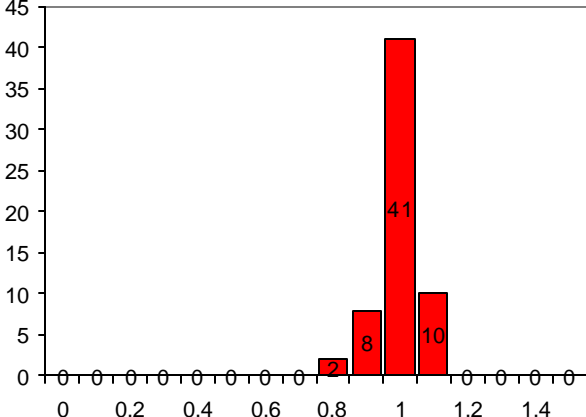

The total assessed value for the 2001 assessment year for Area 19 was \$1,189,294,300. The total recommended assessed value for the 2002 assessment year is \$1,321,359,100.

Application of these recommended values for the 2002 assessment year (taxes payable in 2003) results in an average total change from the 2001 assessments of +11.10%. This increase is due in part to the strong demand for land to develop and previous assessment levels.
